WORK HISTORY

Frontend Developer, 03/2023 - Present

The Datakirk – Edinburgh, UK - Remote

- Worked closely with backend developers and web designers to create brand-new talent matching platform.
- Implemented and debugged numerous frontend features and components using material ui and react.
- Developed mobile-responsive web application, ensuring that users on smartphones had seamless and enjoyable experience.
- Conducted thorough unit testing using Vitest and React Testing Library to ensure delivery of bug-free code.

Frontend Developer, 10/2022 - Present

Built Financial Technologies – Accra, Ghana

- I played a pivotal role in transitioning our company's website from React to Next.js, which significantly improved its SEO performance.
- I collaborated closely with web designers to ensure our interfaces were user-friendly and intuitive.
- I took the lead in creating a revamped dashboard that greatly enhanced the overall user experience.

- I introduced a new budgeting feature, making it effortless for users to create and manage budgets within the application.
- I contributed to the development of an exciting Insurance feature, allowing users to easily purchase insurance products from various providers.
- I implemented a system for internationalized routing, ensuring that our website dynamically adapts to users' locations and seamlessly translates the content into English or French based on their country of origin.

Lead Frontend Engineer, 11/2021 - Present

Salcon Solutions – Glasgow, UK - Remote

- Collaborated with in-house web designers to create sleek and innovative UI design using Tailwind and React or Nuxt.
- Worked as the lone frontend developer to build 2 different web applications (A school management system and a smart search engine to allow law firms search for legal cases)
- Performed unit testing of web applications and troubleshoot issues.
- Optimized web applications for speed, scalability and security.

EDUCATION

Kwame Nkrumah University of Science and Technology - Accra, Ghana
