SKILLS

- **Languages:** Javascript/Typescript, Golang
- **Frameworks, Libraries and tools:** Nodejs, Express, React, Vue, Next, Nuxt, Remix, Solid, Tailwind, Bootstrap, Material UI, MySQL, MongoDB, Prisma, Drizzle, Kysely, Docker

WORK HISTORY

Kwame AI Inc

Accra, Ghana - Remote

Fullstack Developer

04/2024 - Present

- Collaborated with AI and data engineers to build a ChatGPT-like experience tailored for legal professionals and students.
- Designed and developed a brand-new drafting feature enabling users to create legal/business documents such as NDAs and tenancy agreements.
- Implemented advanced Node.js streaming techniques to support real-time streaming of responses from AI services.
- Developed a WhatsApp-integrated bot that allows students to ask Integrated Science questions and take both timed and untimed quizzes — enabling exam prep directly from their phones. [Learn more](#)
- Built a modern and accessible user interface in close collaboration with designers using Nextjs and TailwindCSS.
- Wrote and maintained unit tests using Jest to ensure feature reliability and prevent regressions.

Built Financial Technologies

Accra, Ghana - Remote

Frontend Developer

10/2022 - Present

- Developed a fullstack internal tool to manage employee data using Next.js and Supabase.
- Played a key role in migrating the company website from React to Next.js, significantly improving SEO performance.
- Designed and led the implementation of a modern dashboard to improve the overall user experience.
- Built a new budgeting feature allowing users to manage financial plans directly within the platform.
- Contributed to an innovative insurance module that enables users to browse and purchase insurance products.

The DataKirk

Edinburgh, UK - Remote

Lead Frontend Developer

03/2023 - 03/2024

- Led the frontend development of a new talent-matching platform from scratch.

- Built mobile-responsive UIs using React and Material UI, ensuring a seamless user experience on all devices.
- Collaborated closely with cross-functional teams to design, implement, and refine core platform features.
- Conducted unit testing using Vitest and React Testing Library to deliver high-quality, bug-free releases.
- Debugged complex frontend issues and improved performance across components.
- Conducted thorough unit testing using Vitest and React Testing Library to ensure delivery of bug-free code.

PROJECTS

- **Go Interpreter (in-progress)** – Writing a basic interpreter in Golang. Currently working on the Lexer component to tokenize source code as part of the parsing pipeline.
- **Food Ordering Backend** – Built a backend for an online food ordering system using Express.js, TypeScript, and MongoDB. [View source code](#)
- **Connect (in progress)** – A Discord clone with support for server creation, channel management, invite links, and assigning moderators. Replicates core features of Discord for communication and collaboration. [View source code](#)

EDUCATION

Kwame Nkrumah University of Science and Technology – Kumasi, Ghana

Bachelor of Science: Computer Engineering, 08/2018 – 10/2022

Courses: OOP in Java, Data structures and Algorithms, Operating Systems, Introduction to Software Engineering, Database and information retrieval, Distributed Systems.
